

Press Release

DV6300 is 2013 Product of the Year

Readers of the trade magazine Elektronik vote the diagonal compact fan to the #1 spot

The fifteenth "Product of the Year" was presented on March 14, 2013, and ebmpapst achieved first place with the high-performance DV 6300 diagonal compact fan.

Readers of Elektronik and elektroniknet.de chose the DV6300 as the 2013 Product of the Year in the category "Electrical Engineering" from among 111 nominated products. The award recognises the most innovative and ground-breaking products in the industry. Peter Metzger, Manager of Business Development and Marketing for ebmpapst St. Georgen GmbH & Co. KG, accepted the distinction at the awards ceremony in Munich: "We are gratified to receive this recognition from the readers of Elektronik. The DV 6300 demonstrates how we are setting new standards in state-of-the-art development and production methods."

The winning product from ebmpapst has an electronically controlled S-Force motor with additional options such as temperature regulation, active motor cooling and filter monitoring with signal output for filter change. The diagonal compact fan is ideal for applications with strict requirements regarding air performance with high backpressure, limited installation space and a low operating noise level.
